Hi James,

It hasn't come through on my end yet. I'll keep you updated when it comes through.

Thanks,  
Aaron

Hi James,

I still haven't received my refund so I just wanted to let you know that at this point I'm going to need to put through a dispute through PayPal.

Ok. I also see what has been happening, I issued your refund through my software, but looking at your account now, you actually paid via PayPal which explains why it has not been processed.

I can refund via PayPal when I get home or if you want to claim it you can do that as well,

just let me know so we don't do it twice.

If you can please issue the refund tonight via PayPal that will be much quicker and easier, and email me confirmation once you've done that.

I will do that. I'm home after 8:00pm.

And as a side note. I don't know if you would be interested but the majority of your enclosure is still in house, along with your stand. If you'd like to reconsider, I'd be happy to get that all back together and out to you and of course still issue at least a partial refund for the aggravation.

I know it's been a bit and you may have moved on but if not the option is there for you.

Talk soon.

If I had some type of reassurance that you wouldn't simply stand me up again the next time we scheduled a delivery then I might possibly reconsider, but I'm not sure if that's possible. The only thing I can think of is if you issued a partial refund and I drove down and picked everything up myself from your shop this weekend.

Well, that's of course understandable. Let me give that some thought. Trying to catch up with missing work due to snow so things are crazy but when I have a chance to settle down later today I'll see if I'm able to be ready by then and if it's something that can for 100% be done. I'll get back to you.

I didn't do the refund yet, wanted to talk to you about it, I will pull up the order and work out the percentage, if you were interested in what we talked about yesterday and if the number works for you I'll issue that portion then we can work on the rest.

I'll be back at the shop after lunch to check on the cage status to see if it's in or close to condition to roll. I know it needs glass but other than that I don't think it was touched much.

I do hope we can work it out though. Talk to you soon.

I messaged you the pics to your phone. Did you receive them?  
It's not quite back to ship ready, we used some materials for other projects but can easily get it back up and running.  
Could have it ready for next weekend though, maybe sooner if you came down during the week. I'll be at work today, and will check my messages later on. Hope all is well, talk to you soon.

Unfortunately it looks like the images attached are just blank white with only your logo in the top left corner, nothing else. I'll actually be bringing home another chameleon in March so I need to know very soon if we can work this out or if I need to go with another option.

Thanks,  
Aaron

Ugh. At Least something went through, I'll figure it out tonight when I get in, just taking the canoe down the street in this rain...

Seriously though, i think we can make it work before it comes in. I just need you to see it first to sign off on it. I'll get back to you when I get in.

Here is a resend, if you don't get them the current build status is only missing screen and glass. We have the frame, base and the table. I can have it done by weeks end for a Saturday delivery or a during the week pick up.

Or if you'd rather change things up, I have a pretty good inventory of black PVC which we can swap out for. Many options. Let me know when you have a moment.

Hi James,

There's nothing attached.

I'm not looking to make any changes. This Saturday is my drop-dead date; I can't wait any longer than that. It's already been over 5 months since this whole project started.

Hi James,

Can you please give me an update on where things stand with my refund?

I may still have a need for a simple base cabinet, but different dimensions. If you can give me my refund by this weekend I can consider going through you for a base cabinet, depending on how quickly you could get it done.

Thanks,
