

FedEx Express requires a sample of the packaging to be submitted to the FedEx Packaging Design and Development department for evaluation. Below are the packaging guidelines for shipping live, harmless reptiles.

Recommended Packaging

Minimum Packaging Requirements

PACKAGING SYSTEM

The following components are required when accepting a packaging system for live reptiles.

- Live reptile inside a primary container. If primary container is a plastic dish with a lid, the lid must be secured by the appropriate amount of additional closure (tape, rubber bands, staples, etc.) to prevent the lid from separating. "Snap-on-lids" alone are not sufficient and require additional closure. If primary container is a cloth bag, bag must be sealed (tight knot, plastic cable-tie, folded over and taped, etc.) for proper containment.
- Cloth bags used to contain reptile may not have holes, cutouts or tears.
- Void fill (foam peanuts, newspaper, shredded paper, etc.) placed on all sides of the primary container to cushion and secure the container from shifting inside of the package while in transit.
- Sturdy outer box (recommend a minimum burst strength rating of 200 lbs.) sealed with a minimum 2" wide pressure sensitive tape. Duct or electrical tape is not permitted.

Optional Additions:

- Heat/cold pack for thermal protection from outside temperature and humidity changes.
- Foam panels placed inside all six faces of box to enhance overall structural integrity of package and for additional insulation of contents. Appropriate thickness of foam should be used for different box sizes.

LABELING AND TAPING

- "▲▲" or "THIS SIDE UP" labels are recommended.
- "LIVE HARMLESS REPTILE" on two sides of the box.
- Place Airbill or POWERSHIP label on top of largest side.
- Recommend using the "H-taping method" on the top and bottom of the package as illustrated at upper left.

RESTRICTIONS

- FedEx boxes should not be used as the outer container.
- Shipments are restricted to Domestic U.S. locations via FedEx Express service only. Live animal shipments via FedEx Ground are strictly prohibited.

For more efficient processing, please write the name of your FedEx Sales Representative in the space provided on the Packaging Services Application when submitting for testing.
