List XXII: Herpetology

July 2016

Contact: Jay Cordeiro; unionid@comcast.net;

Northeastern Natural History & Supply pleased to present our very first list of herpetology new and out of print books, serials, and prints for sale! Although not terribly large, the list has more than its share brand new recently published works. List XXII includes over 200 works on herpetology (amphibians and reptiles).

Please contact me with any questions or for images; particularly of the maps as not all are included here. Please excuse any cross postings and feel free to distribute this list to other interested parties. If, for any reason, you wish to be removed from future mailings of this list or if you are receiving duplicates, please let me know and I will rectify the situation accordingly.

We ship both nationally and internationally with U.S. domestic shipping via U.S.P.S., U.P.S. or Federal Express. Within the U.S., USPS Priority or Express Mail are available with insurance and tracking extra. Larger orders may be shipped by other carriers. At this time, we can accept personal checks, bank checks, money orders; and also Paypal. We are always interested in library acquisitions so if you have duplicates, a private library, or a collection of natural history works you wish to sell or trade, contact us directly. We can also broker your library materials for you via upcoming lists.

This editions's quote is about the study of herpetology...

"A herp is simply the kind of animal studied by a herpetologist, and that is a pretty lame way to define an animal. The only other name that comes close is the biblical 'creeping thing'"

Richard Dawkins

WHAT WE DO—

BOOKS:

Northeast Natural History & Supply is a provider of new, used, and antiquarian books, monographs, and journals on all disciplines of natural history. We offer works for sale on a wide range of disciplines including malacology, astacology, entomology, other invertebrate zoology, ichthyology, herpetology, ornithology, mammalogy, paleontology, geology, mineralogy, archaeology, anthropology, astronomy, chemistry, and physics. It is our desire to share our appreciation for the natural world on the printed page to those around us.

MUSEUM SUPPLIES:

Northeast Natural History & Supply is also a distributor of archival storage supplies designed for museum, institutional or personal collections. If your current situation warrants purchasing new archival specimen trays or drawers please consider our product in your museum, institution, or personal collection. Our specimen trays are designed for curation, storage, re-housing, and display; and can be utilized for shells, minerals, skeletal material, feathers, eggs, skins, anthropological objects, fossils, glass vials, as well as other materials, memorabilia, and valuables. Archival trays come in a variety of sizes and are nested for maximum storage efficiency in specimen cabinets produced by most manufacturers. Please contact us with quantity and size specifications for a quote.

BIOLOGICAL SUPPLIES:

Recent expansion into wildlife and biological supply products has allowed **Northeast Natural History & Supply** to provide wholesale and retail services to major institutions including schools, universities, government agencies, and natural resource and conservation organizations. Look for other products in the future as our company grows.

At the hospital, Richardson was a mentor to Thomas Huxley and was influential in directing Huxley to a position on the HMS Rattlesnake because too young to apply for a position at the Royal College of Surgeons. Huxley went on to become a chief proponent of Darwin's theory of Natural Selection furthering the idea that humans evolved from hominids and, as an excellent anatomical surgeon, coined the term "agnostic".]

(1 color) (numbered separately) **[2 plates from this work]**

- 10.5 x 7" triple matted, reptile plates 4 and 5 [Richardson was likely Sir John Richardson, one time Chief of the Collections of Hasler Naval College, which had a considerable collection of natural history items brought back from sailors. At the hospital, Richardson was a mentor to Thomas Huxley and was influential in directing Huxley to a position on the HMS Rattlesnake because too young to apply for a position at the Royal College of Surgeons. Huxley went on to become a chief proponent of Darwin's theory of Natural Selection furthering the idea that humans evolved from hominids and, as an excellent anatomical surgeon, coined the term "agnostic".] **\$35 each**

- Pls. 35-37, 11.5 x 8.5", very good [The expedition from 1849-52 led by naval astronomer James Gilliss was a project of the U.S. Naval Observatory to travel to Chile to determine the "solar paradox"; or scale of the solar system, by observations of Mars and Venus. Gilliss took the expedition far beyond its original purpose to the broader interest of science, geography, and politics. Volume II included information on the animal, mineral, and fossil collections returned from the expedition. The equipment and building that housed it were sold to the government of Chile which founded the National Astronomical Observatory there. Prints drawn by William H. Dougal. Artist and lithographer is J.H. Richard] **\$30 each**
