History notes:

[Renee B 07/11/13 1:27 PM] Owner just recieved this Turtle from the lower 48, she suspects he has mouth rot and asked if she can bring in a swab to confirm. Per VLC I told her that we do need to examine the pet to give a diagnosis. She will monitor at home for the next couple of days, if there is no improvement she will call to make appt.

Record No: 77872 Date: 07/18/13 Patient: Bart Client: #7521 Deb Thomas Date Closed: 07/18/13

History

Location	Provider	Problem	Provider
	0	check mouth	Dr. Craig

History notes:

Owner has had tortoise for about 8 days. Got from a dealer in FL. Tortoise has been active, but not wanting to eat yet. Owner has been soaking tortoise daily. Owner has been swabbing mouth out with dilute Povidine Iodine solution daily.
